

# INDOW INSERTS ARE THE NEW SOLUTION

CALL (503) 284-2260 OR VISIT  
INDOWWINDOWS.COM TO WATCH  
VIDEO DEMONSTRATIONS AND  
LEARN ABOUT CREATING A MORE  
COMFORTABLE AND EFFICIENT HOME.

Indow inserts are made in Portland, Oregon from 100% USA components.

**“INDOW INSERTS ARE NOT  
LIKE STORM WINDOWS, YOU POP  
THEM OUT AND YOU POP THEM  
IN. IT TAKES JUST A SECOND AND  
YOU DON’T HAVE TO GO OUTSIDE.”**

**Maggy F., Portland, OR**

**“THEY LOOK PERFECT, NO ONE  
KNOWS THEY’RE THERE AND  
THE STREET NOISE HAS BEEN  
DRASTICALLY REDUCED,  
IT HAS TRULY IMPROVED  
THE QUALITY OF OUR LIVES.”**

**Laurie D., Brooklyn, NY**

## BETTER THAN REPLACEMENT WINDOWS.

# INCREASE COMFORT

## WITHOUT TOUCHING THE THERMOSTAT

Keep the elements out and the comfort in with Indow window inserts. Our innovative inserts press inside your window frames to give you double-pane performance at a much lower cost. As you press them in, the patented Compression Tube squeezes inside the window frame to hold the inserts in place without a mounting bracket. It's easy and the inserts virtually disappear when installed. Let the beauty of your windows shine through without drafts and energy loss.

## AS EASY AS 1-2-3

**1** Center the insert, making sure it overlaps the frame equally on both sides and push the bottom into the frame. **2** Hold both sides and gently bend the insert into the top of the window frame. **3** Press the compression tubing in across the top and down the sides and push the ball chains into the tubing.

# ENJOY QUIET AND SAVINGS

Press Indow inserts inside your window frames to transform your room. You will suddenly enjoy:

**QUIET** Block up to 70% of the noise coming through your windows.

**SAVINGS** Double-pane window efficiency at a much lower cost.

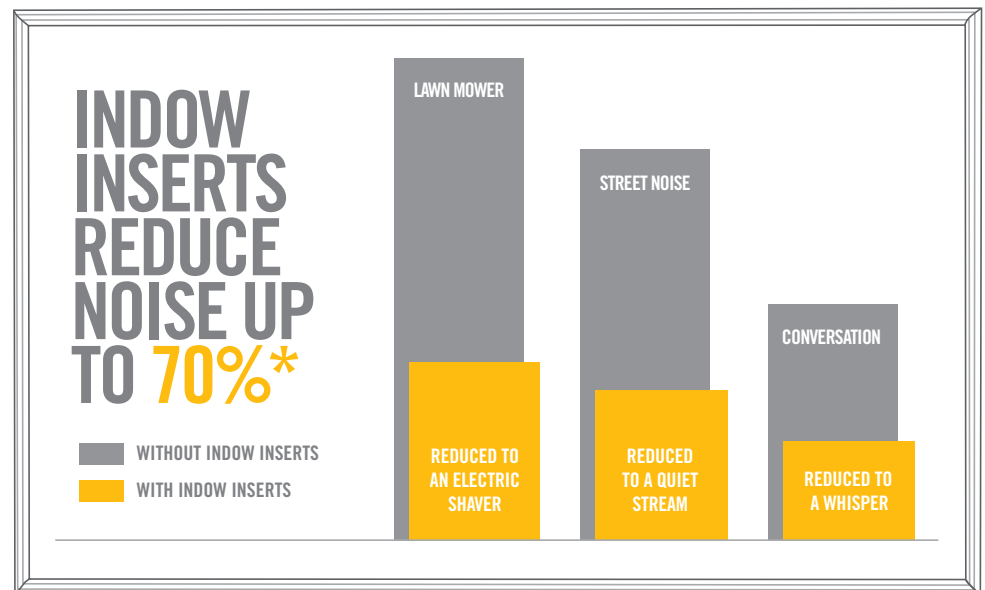

**COMFORT** Block cold drafts and hot summer air.

**GREAT AESTHETICS** Virtually invisible and ideal for historic window frames.

**PRECISION** Laser measure for a custom fit every time.

**EASE OF USE** Lightweight for simple installation and removal.

*See video demonstrations, testimonials and performance data at [indowwindows.com](http://indowwindows.com)*

\*Please note the 70% sound deadening performance is based on tests where Acoustic Grade Indow inserts were placed over operable single-pane windows. Overall sound reduction depends on the sound coming through your walls and doors. The noise reduction will be less when Indow inserts are placed over double-pane windows.
